The Business Case for Service Design

If you want to convince your organization to start doing service design, it's crucial to have compelling reasons for why service design is great for business. Here we provide you with the ammunition you need. We also give you a few tips on how to identify the right moment to introduce service design to your organization.

What benefits can your organization gain through service design?

- You might already have a quality product, but great customer service on top of that will help you build brand loyalty so your customers keep coming back.
- Great customer experiences are no longer a nice-to-have; they are simply what consumers expect. Consumers will go elsewhere if your organization fails to deliver.
- Service design helps you maximize resources because it helps you see new opportunities for the products and resources your organization already has.
- All organizations have services, but not all organizations purposefully design them. Purposeful service design allows you to innovate your organization's services to make them cheaper and more pleasant for your customers at the same time.

- Purposeful service design can help you reach more markets because you can adapt your service to fit local requirements.

What benefits can your team gain through service design?

- Service design takes the entire organization into account, so it's a great way to build stakeholder engagement with your team.
- Service design is customer-centered at its core, so it will help your team become more human-centered.
- The service design process will provide your team with excellent customer insights which your entire organization can use.
- Service design can help you build faster innovation cycles.

When are the best moments for introducing service design to your organization?

- When you don't have a clear value proposition for your product, service design can help you find one.
- When you have a sense that customers should have a better experience with your products than they are having.
- When you don't have a clear idea of what kind of experience you want your product to deliver.
- When your organization or product offering is complex and unclear, either internally or for your customers.

Learn how to use this template to your best advantage in our online course Service Design: Delivering Integrated Service Experiences. Sign up for it today and learn how to design and deliver your own service experiences.

Service Design: Delivering Integrated Service Experiences

Intermediate course

Service Design is important! People engage with services every day and everywhere, so **as designers we can make a big difference** to a lot of people if we ensure that those services are efficient and provide a great experience. We can also make a big difference to our businesses and organizations if we ensure that services are delivered better than our competitors.

By the end of the Service Design: Delivering Integrated Service Experiences course, you'll know how to confidently run a service design project and which tools and methods to use along the way. You'll also know how to evangelize service design in your organization and with your stakeholders, and how to assemble a service design team.

If you're already familiar with **human-centered design methods** or work in **user experience, product design** or even **C-Suite business management**, then this course will extend your skills and show you how to deliver integrated and omni-channel services as part of a collaborative team. You'll be able to apply a deeper understanding to your existing work to achieve even better results.

About the Interaction Design Foundation

INTERACTION DESIGN FOUNDATION

With over 66,000 alumni, the Interaction Design Foundation is the biggest design school globally. Industry leaders such as IBM and Adobe train their teams with our courses, and universities such as MIT and the University of Cambridge include our courses in their curricula. Our online courses are taught by industry experts and cover the entire spectrum of UX design from beginner to advanced. We give you industry-recognized course certificates to advance your career. Since 2002, we've put together the world's biggest and most authoritative library of open-source UX Design literature created by such noted authors as Don Norman and Clayton Christensen.
